Pacsana walkthrough Illustration brief

Fourteen portrait illustrations for an interactive product walkthrough — one per step, each showing the person doing whatever that step describes. The pictures in this brief are placeholder drawings generated in code for the working demo. They show the composition and the intent; they are not the style target.

Deliverable	**14 portrait illustrations, 1:2 (e.g. 1200 × 2400 px)**
Formats	**SVG preferred, plus PNG at 1200 × 2400; layered source files if the style allows**
File names	**As printed on each page, e.g. `11-stumble`**
Where they go	**`public/media/walkthrough/` on the demo site**
How they appear	**A tall panel beside the text. The image is cropped to fill, so it is trimmed left and right on a narrow panel and top and bottom on a short one**
Safe area	**Keep the figure and anything that matters inside the middle 70% vertically and 80% horizontally**
No text in the artwork	**The captions in the reference renders are drawn by the page, not the image**

STYLE TARGET

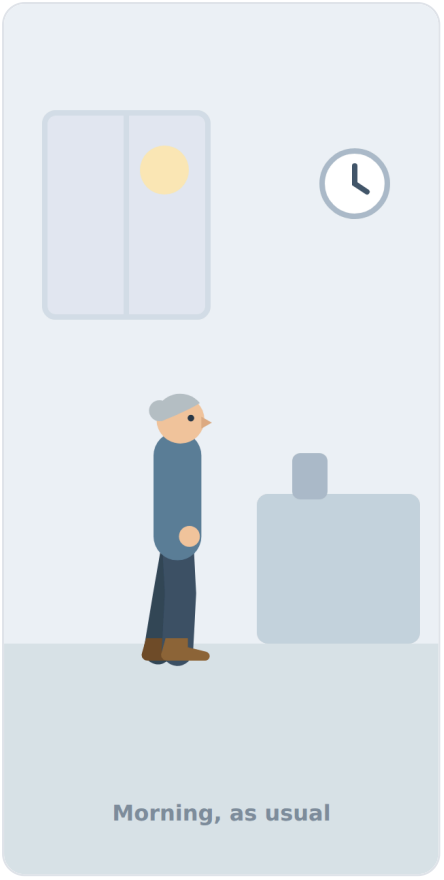

Flat vector with soft shading. Warm, domestic and unfussy — closer to a good public-information illustration than to a tech marketing style. Solid shapes, no outlines, restrained texture.

WHO THIS IS FOR

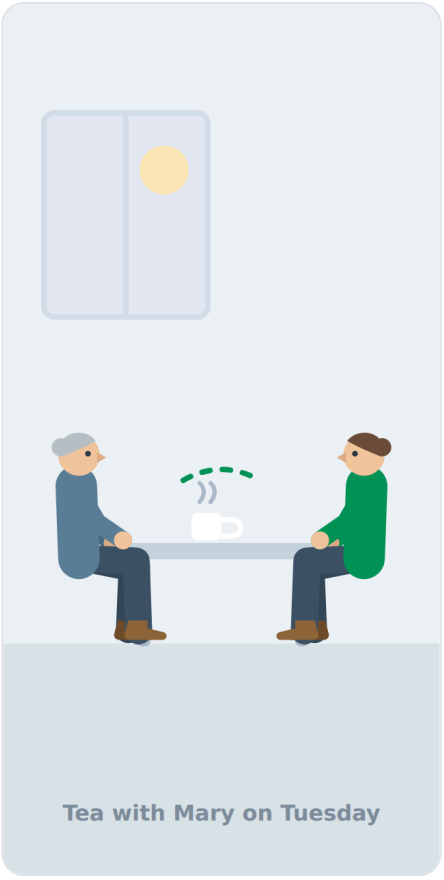

Older adults living independently, and the family members and care workers around them. Many viewers will be in their seventies and eighties; the rest will be their children. The work has to read well to both, at small sizes, on a phone.

The cast

Three recurring characters. They appear across multiple steps and must be recognisably the same people each time — same build, hair, clothing and colouring. A character sheet for each, before the scenes are drawn, would be the right first delivery.

Peg — the subject. Late seventies, lives alone, manages well. Grey hair worn up, blue-grey cardigan, dark trousers, flat shoes. Upright and capable; she uses a stick outdoors but not indoors.

Mary — her daughter, forties or fifties, green cardigan, darker hair. Appears in the circle, visit, walk, alert and closing steps. Warm rather than anxious.

Tom — the care worker, orange top. Appears once, in the circle step. Professional, friendly, not in uniform scrubs.

HOW PEG SHOULD BE DRAWN

- Capable and dignified. She is the person the product serves, not a patient being managed.
- Her age should be legible — grey hair, a little stoop — without caricature. No frailty shorthand: no hunching over a zimmer frame, no vacant expression.
- She keeps her own clothes and her own home. Nothing in the set should look institutional.
- She is alone in most frames and that is fine: the story is independence, not loneliness. Only the alert step shows her unaware of something happening elsewhere.
- No sensor or device is ever visible on her. The product is meant to disappear.

Working rules

PALETTE

	Wall / daylight interior	`#EEF2F6`		**Floor**	`#DBE3EA`
	Night wall	`#31465C`		**Night floor**	`#27384A`
	Outdoor sky	`#DFEAF2`		**Grass**	`#CFE3D2`
	Peg — cardigan	`#5D7F99`		**Cardigan shadow**	`#4A6B86`
	Trousers	`#3C5266`		**Shoes**	`#8C6437`
	Skin base	`#F0C69F`		**Skin shadow**	`#DCAE86`
	Hair, grey	`#B6C0C7`		**Furniture**	`#C7D3DC`
	Lamp / warm light	`#F3C98B`		**Foliage**	`#7FB493`
	Ocean — app accent	`#005BB3`		**Emerald — family, good**	`#029456`
	Tangerine — care worker, watch	`#F86A38`		**Ruby — alert**	`#D8226C`

DAY AND NIGHT

- Steps 4 and 6, and the lower halves of 3 and 12, are night: dark walls and floor, warm lamp light the only bright source.
- Everything else is daylight. Keep interiors the same room throughout so the house stays consistent.

ACCENT COLOURS

- The four accent colours carry meaning: blue for the app and its connections, green for family and all-clear, orange for the care worker and for watch-this, pink-red for alerts only.
- Use them sparingly — a connecting line, a phone screen, a motion mark. The scenes themselves stay in the domestic palette.
- Never use colour alone to carry meaning: the alert step reads as an alert because of what Mary is doing, not because the phone is pink.

TONE

- Reassurance, not surveillance. Nothing in the set should suggest being watched: no cameras, no screens observing her, no dashboards floating over her head.
- No medical imagery. No hospital beds, no pill boxes, no blood-pressure cuffs, no red crosses.
- Step 11 is a stumble **caught**. She stays on her feet in every frame of this set.
- Peg is never shown distressed, confused or asleep in a chair.

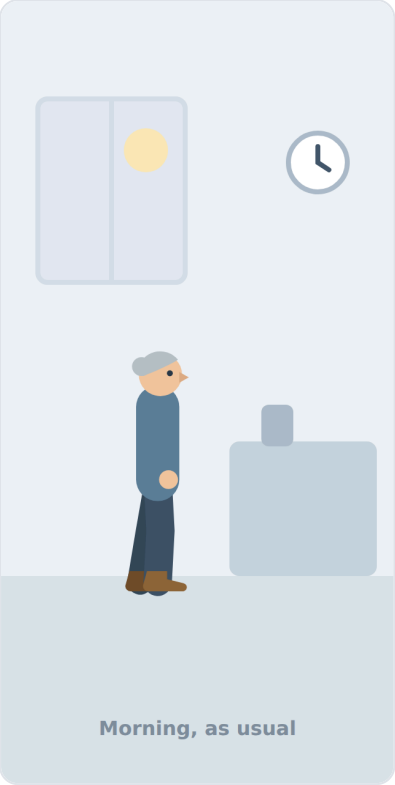

PRACTICAL

- Design for a panel about 240 px wide on a laptop, 330 px on a phone. Test faces, the stick and the lamp glow at that size.
- Keep backgrounds simple — the figure carries each frame, the room is context.
- Irish domestic setting. No recognisable people, brands or buildings; nothing traced from stock photography.
- Steps 3 and 12 share a split frame; 7, 9 and 10 share the outdoor setting. Deliver each separately, built from common components.

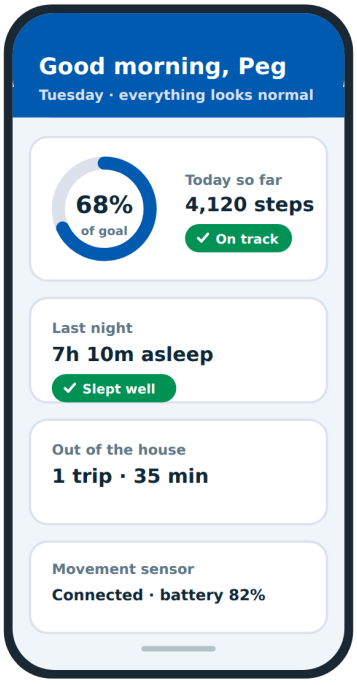

01 The daily picture

WALKTHROUGH STEP 1 OF 14

`01-morning`

Current code-drawn version — reference only

The app screen it sits beside

NARRATION FOR THIS STEP

> *“Here is a quick tour of the Pacsana mobile app, and how it reads your daily movement.”*

WHAT THE PICTURE MUST CARRY

Establishes the person and the tone: an ordinary, capable adult at home on an ordinary morning.

COMPOSITION

Peg standing in her kitchen, three-quarter view, kettle and worktop behind her, daylight through the window. Full figure, feet on the floor, roughly two-thirds of the frame height.

NOTES

She is not being cared for in this frame — she is just living. No sensor visible, no medical props. This is the first impression of the whole tour, so it sets her age and character for every later scene.

ALT TEXT TO MATCH

An older woman standing in her kitchen on an ordinary morning

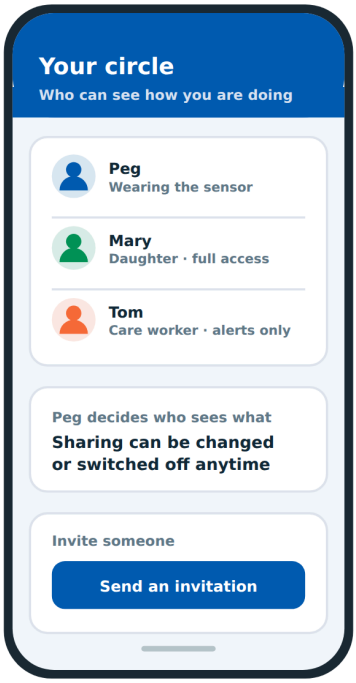

02 Your circle

WALKTHROUGH STEP 2 OF 14

`02-circle`

Current code-drawn version — reference only

The app screen it sits beside

NARRATION FOR THIS STEP

> *“See how easy it is to stay connected, so family and carers know you are well.”*

WHAT THE PICTURE MUST CARRY

The people around her: family and a care worker, connected through the app rather than hovering.

COMPOSITION

Peg centre, her daughter Mary to one side and Tom the care worker to the other, both a little smaller and holding phones. A light connecting line arcs between them.

NOTES

Keep the others slightly behind her and never looming. Different ages, builds and skin tones across the three. Peg is the subject; they are the supporting cast.

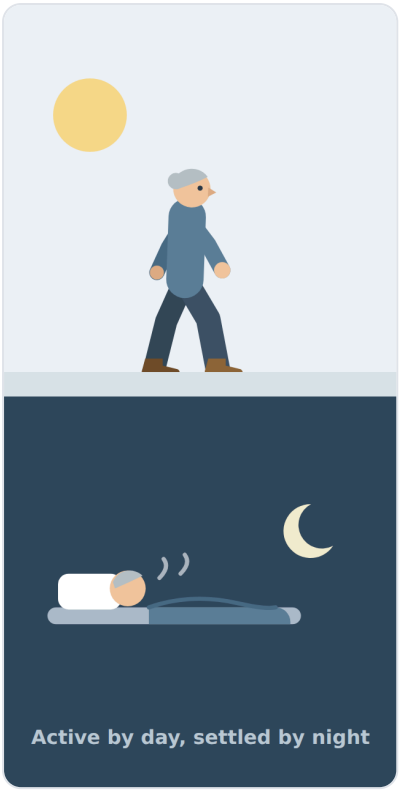

ALT TEXT TO MATCH

The same woman at home with her daughter and a care worker, both holding phones

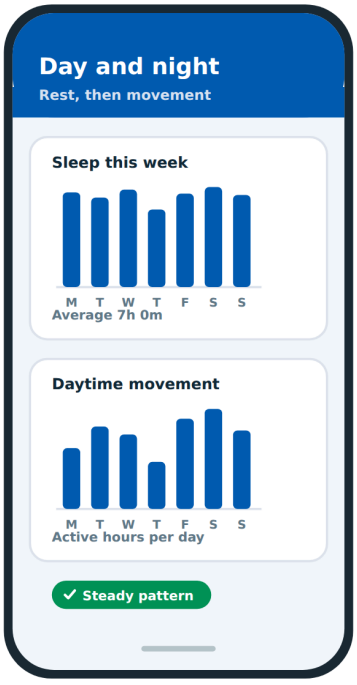

03 Rest and movement

WALKTHROUGH STEP 3 OF 14

`03-day-night`

Current code-drawn version — reference only

The app screen it sits beside

NARRATION FOR THIS STEP

> *“Are you resting well at night, and are you mobile during the day?”*

WHAT THE PICTURE MUST CARRY

The two halves of the pattern the product reads: active by day, settled by night.

COMPOSITION

One frame split horizontally — daylight above with Peg mid-walk, night below with Peg asleep in bed. Sun top, moon bottom.

NOTES

The split should be a clean band, not a gradient. Both halves show the same person in the same clothes and bedding across the set.

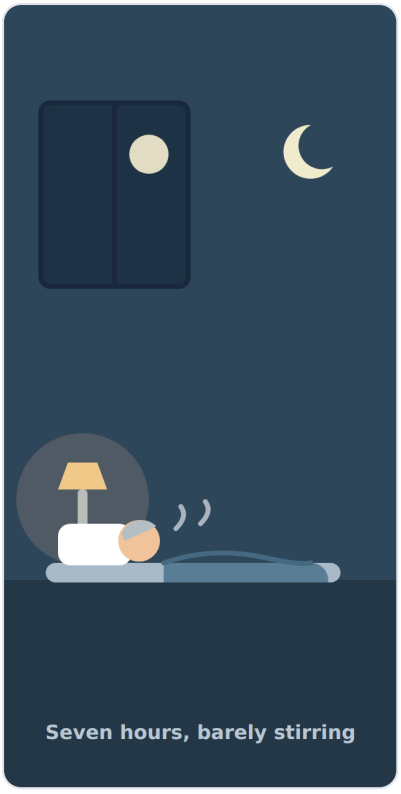

ALT TEXT TO MATCH

A split scene: walking outdoors by day, asleep in bed by night

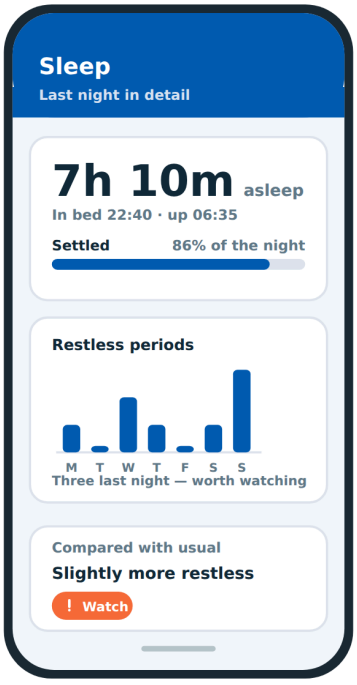

04 Sleep in detail

WALKTHROUGH STEP 4 OF 14

`04-sleeping`

Current code-drawn version — reference only

The app screen it sits beside

NARRATION FOR THIS STEP

> *“Are they sleeping well?”*

WHAT THE PICTURE MUST CARRY

Sleep, shown as restful rather than monitored.

COMPOSITION

Peg asleep on her side in bed, bedside lamp on low, dark room. Side view, covers drawn up, face calm.

NOTES

Warm lamp light is the only bright thing in the frame. No monitor, no wires, no clinical bed — this is a bedroom, not a ward.

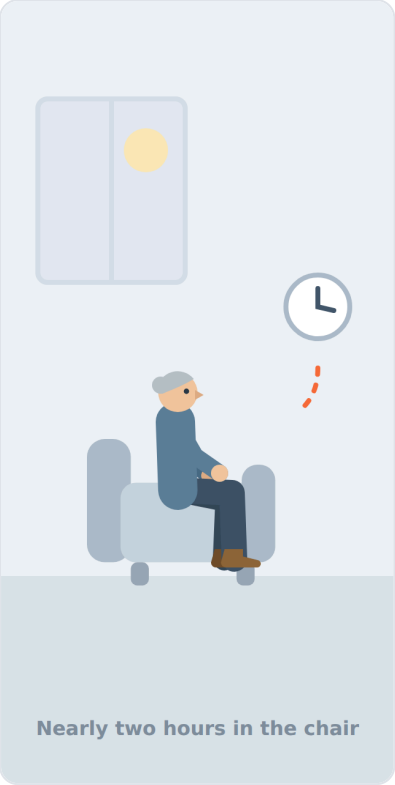

ALT TEXT TO MATCH

The woman asleep in bed with a bedside lamp on low

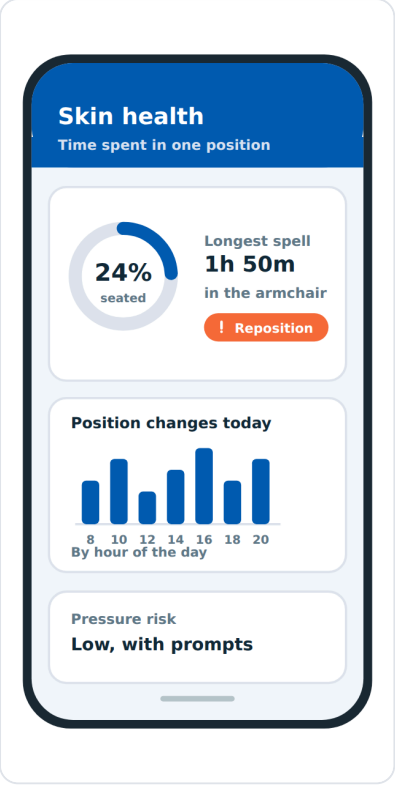

05 Skin health

WALKTHROUGH STEP 5 OF 14

`05-armchair`

Current code-drawn version — reference only

The app screen it sits beside

NARRATION FOR THIS STEP

> *“How is your skin health?”*

WHAT THE PICTURE MUST CARRY

Time spent in one position, which is the pressure-damage risk the app watches.

COMPOSITION

Peg seated in her armchair, side view, a clock on the wall behind showing time having passed. She is comfortable, not distressed.

NOTES

The clock carries the meaning; her posture should look ordinary. Avoid anything that reads as a hospital chair.

ALT TEXT TO MATCH

The woman seated in an armchair, with a clock showing time passing

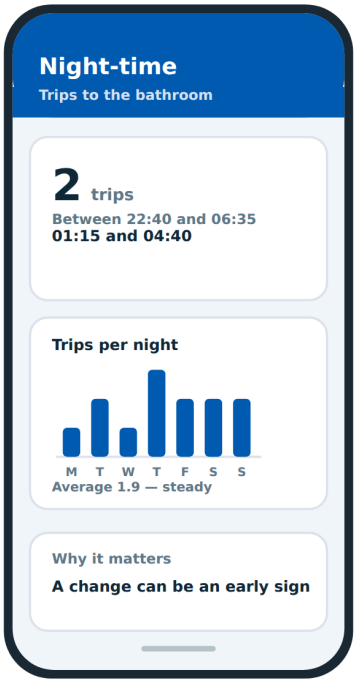

06 Night-time trips

WALKTHROUGH STEP 6 OF 14

`06-night`

Current code-drawn version — reference only

The app screen it sits beside

NARRATION FOR THIS STEP

> *“How often did you visit the bathroom last night?”*

WHAT THE PICTURE MUST CARRY

Getting up in the night: the trip the app counts, and the moment a fall is most likely.

COMPOSITION

Dark bedroom, Peg walking towards a lit doorway, bedside lamp behind her casting the only light. Side view, mid-stride, steady on her feet.

NOTES

She is steady here — the stumble belongs to step 11. Light should read as a nightlight or landing light, not a searchlight.

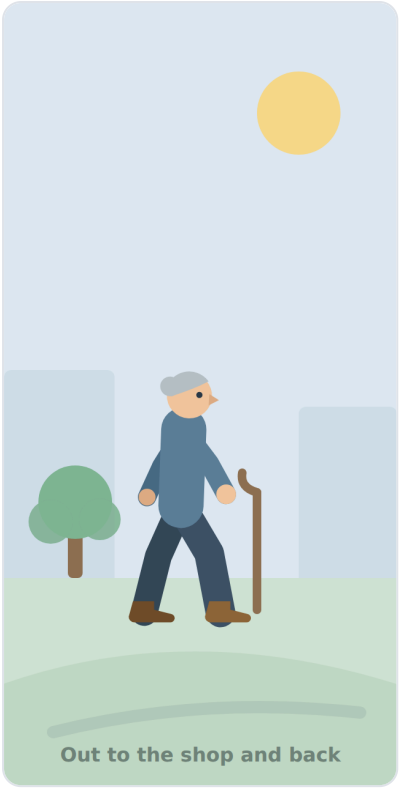

ALT TEXT TO MATCH

The woman walking to the bathroom at night, lit by a bedside lamp

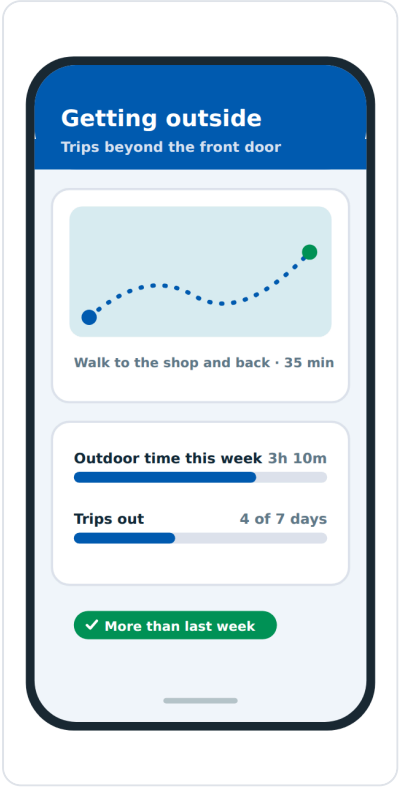

07 Getting outside

WALKTHROUGH STEP 7 OF 14

`07-outdoor`

Current code-drawn version — reference only

The app screen it sits beside

NARRATION FOR THIS STEP

> *“Are you getting outside to exercise?”*

WHAT THE PICTURE MUST CARRY

Getting out of the house, counted separately from moving around indoors.

COMPOSITION

Peg walking outdoors with a stick, tree and path, houses set back. Full figure, mid-stride, purposeful.

NOTES

The stick is an ordinary walking stick, held naturally — it should not be the subject. Show somewhere that looks like an Irish street or park rather than generic suburbia.

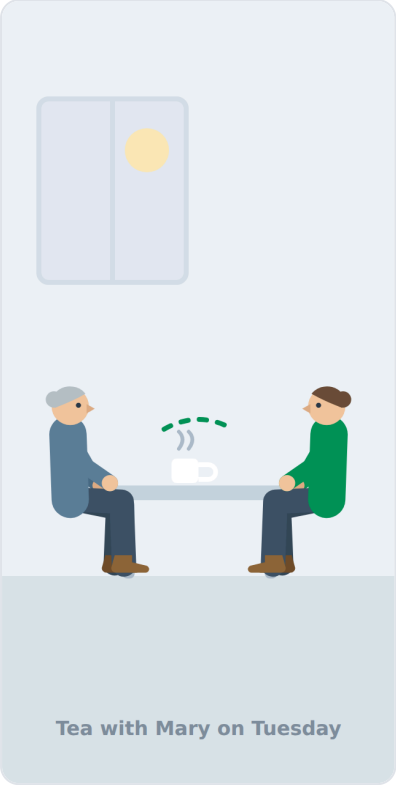

ALT TEXT TO MATCH

The woman walking outdoors with a stick, past a tree

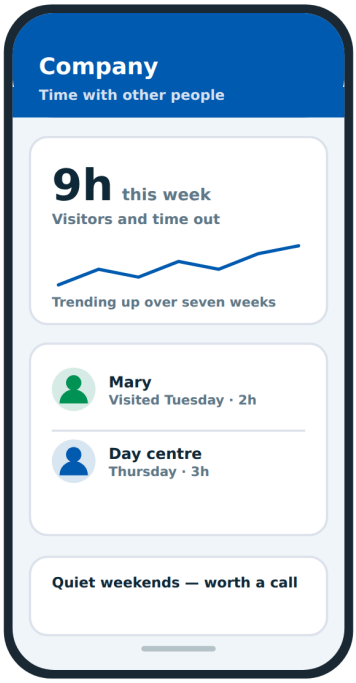

08 Company

WALKTHROUGH STEP 8 OF 14

`08-visitor`

Current code-drawn version — reference only

The app screen it sits beside

NARRATION FOR THIS STEP

> *“How much are you socialising?”*

WHAT THE PICTURE MUST CARRY

Company: time with other people, which the app tracks as a wellbeing measure.

COMPOSITION

Peg and Mary at the kitchen table with tea, facing each other, mid-conversation. Two seated figures, table between.

NOTES

Warm and unremarkable. The point is that this is a normal visit, not a care appointment.

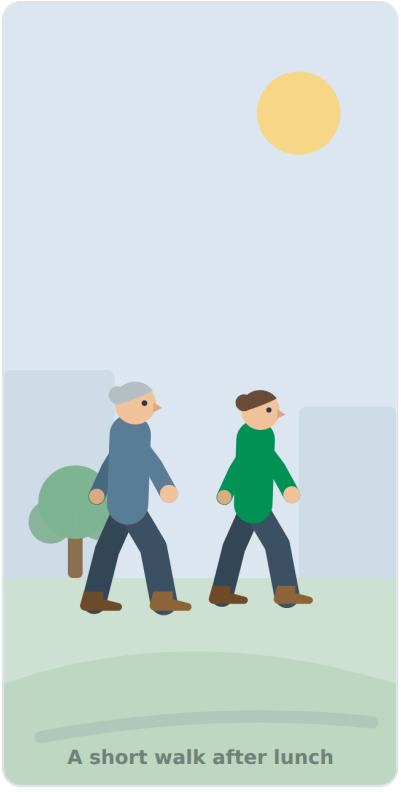

ALT TEXT TO MATCH

The woman and her daughter having tea at the table

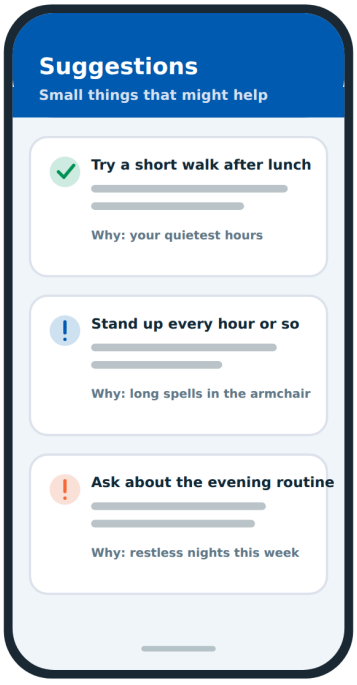

09 What might help

WALKTHROUGH STEP 9 OF 14

`09-stroll`

Current code-drawn version — reference only

The app screen it sits beside

NARRATION FOR THIS STEP

> *“The app also gives advice on what might help improve your health.”*

WHAT THE PICTURE MUST CARRY

The suggestion the app makes, being acted on.

COMPOSITION

Peg and Mary walking outdoors together after lunch, both mid-stride, light and open setting.

NOTES

Should feel like a choice, not a prescription. Companionable pace — neither person leading or supporting the other.

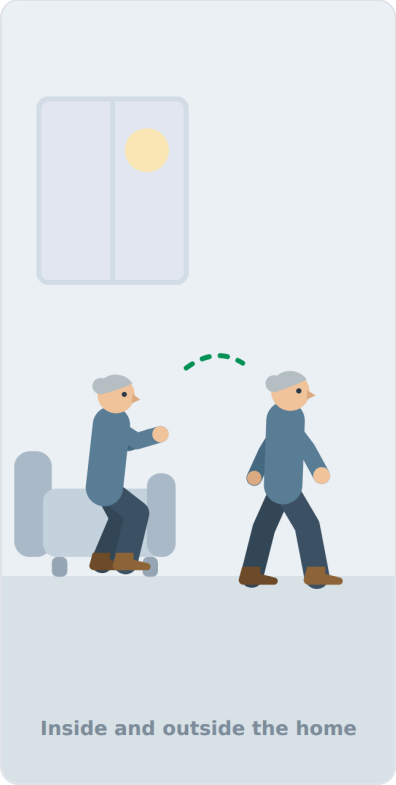

ALT TEXT TO MATCH

The woman walking outdoors with her daughter after lunch

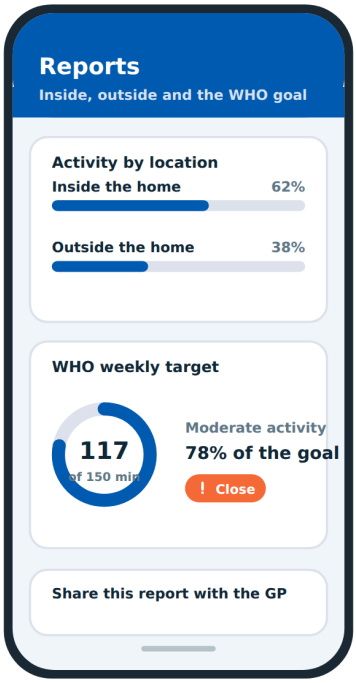

10 Reports

WALKTHROUGH STEP 10 OF 14

`10-exercise`

Current code-drawn version — reference only

The app screen it sits beside

NARRATION FOR THIS STEP

> *“A set of reports looks at exercise both inside and outside the home, and checks whether you are meeting the WHO goals.”*

WHAT THE PICTURE MUST CARRY

Activity inside and outside the home, which the reports separate.

COMPOSITION

Two moments in one frame: Peg rising from her armchair indoors on one side, walking outdoors on the other, with a light connector between them.

NOTES

The two halves need to read as the same day, not two different people. Keep the indoor half domestic, the outdoor half open.

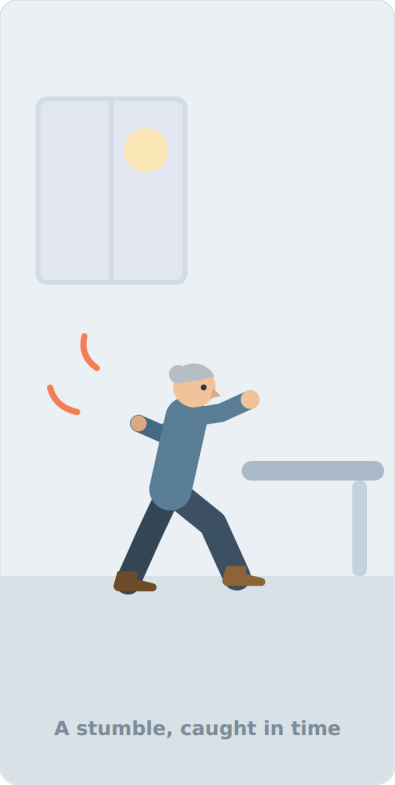

ALT TEXT TO MATCH

The woman rising from her chair indoors and walking outdoors

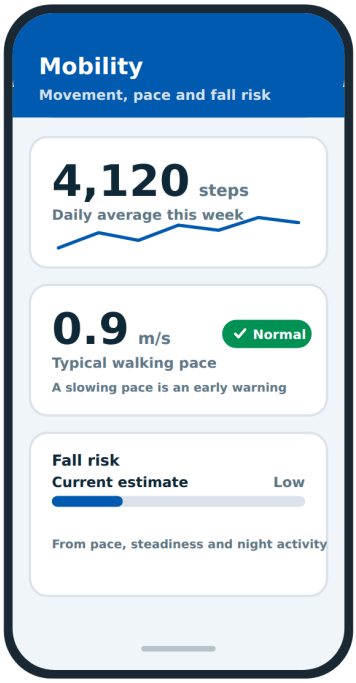

11 Mobility

WALKTHROUGH STEP 11 OF 14

`11-stumble`

Current code-drawn version — reference only

The app screen it sits beside

NARRATION FOR THIS STEP

> *“Are you moving enough? How fast are you getting around? And how likely are you to fall?”*

WHAT THE PICTURE MUST CARRY

The fall risk the app estimates — a stumble caught, not a fall.

COMPOSITION

Peg off balance mid-stride, one hand reaching and landing on the worktop, the other arm out. Motion marks show the wobble. She stays on her feet.

NOTES

This is the most sensitive image in the set. She must be recovering, not falling, and never on the floor. No injury, no alarm, no distress on her face — the emotion is 'that was close', not 'help'.

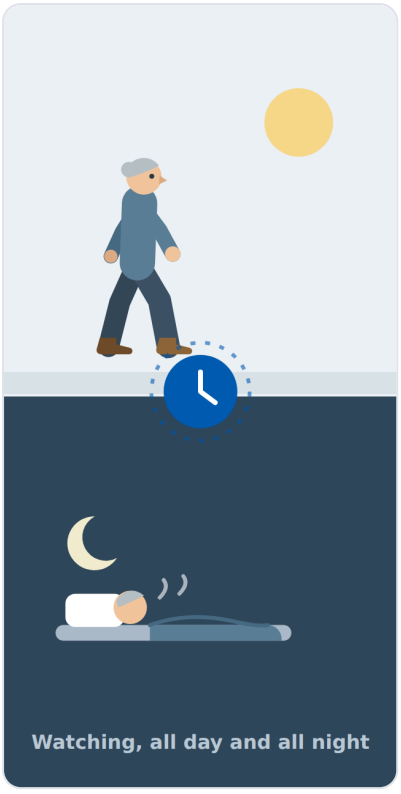

ALT TEXT TO MATCH

The woman stumbling and catching herself against the worktop

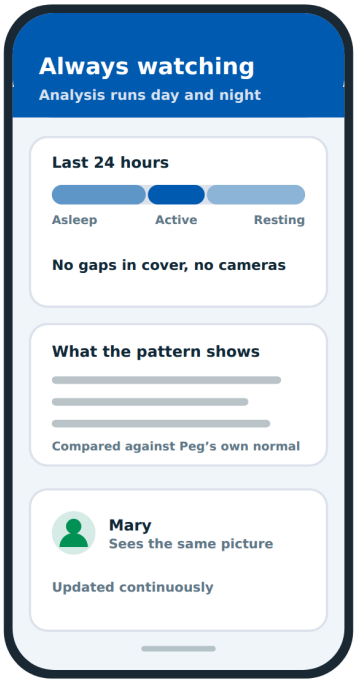

12 Watching around the clock

WALKTHROUGH STEP 12 OF 14

`12-round-clock`

Current code-drawn version — reference only

The app screen it sits beside

NARRATION FOR THIS STEP

> *"Carers cannot be there all the time, but Pacsana analyses the data 24/7."*

WHAT THE PICTURE MUST CARRY

The analysis runs continuously, through the hours when nobody is there.

COMPOSITION

Day above and night below in one frame, Peg walking in the daylight half and asleep in the night half, a clock motif on the dividing line.

NOTES

Closest in construction to step 3 but must be distinguishable — different time of day in the daylight half, or a different room below.

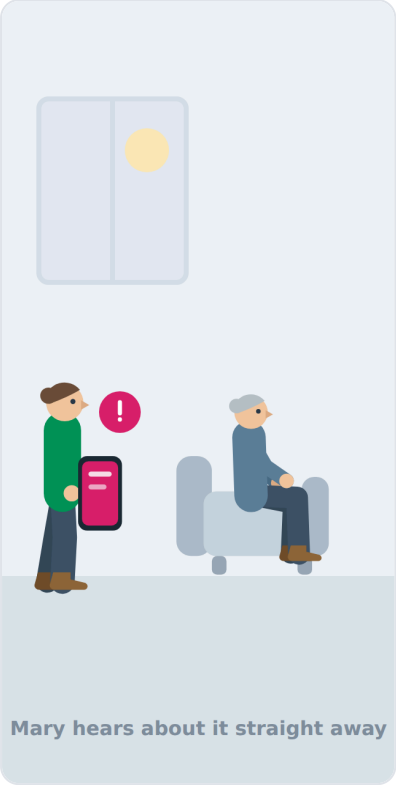

ALT TEXT TO MATCH

Day and night together: walking above, asleep below, a clock between

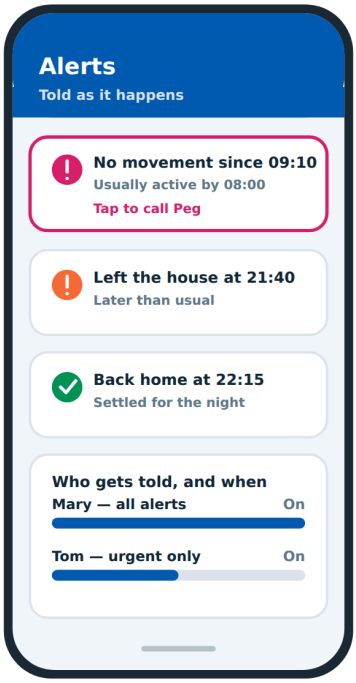

13 Alerts as they happen

WALKTHROUGH STEP 13 OF 14

13-alert

Current code-drawn version — reference only

The app screen it sits beside

NARRATION FOR THIS STEP

> *“And they can be notified of specific events that happen in real time.”*

WHAT THE PICTURE MUST CARRY

A real-time alert reaching the person who needs it.

COMPOSITION

Mary in the foreground reading an alert on her phone, expression attentive rather than panicked. Peg visible behind, seated at home and unaware.

NOTES

Mary should look like someone deciding whether to ring, not someone watching a disaster. Peg is fine in this frame; the alert is information, not an emergency.

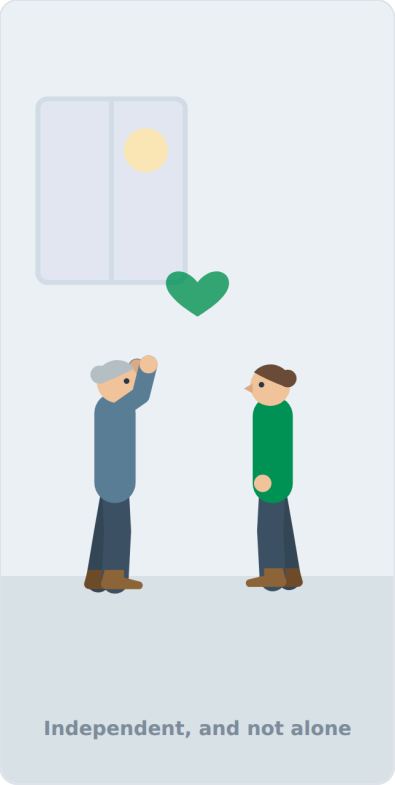

ALT TEXT TO MATCH

The daughter receiving an alert on her phone while her mother sits at home

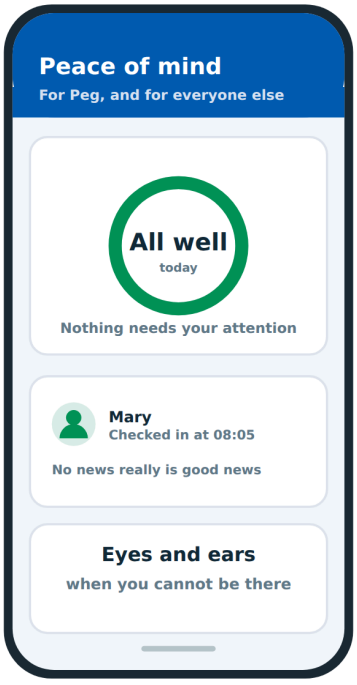

14 Peace of mind

WALKTHROUGH STEP 14 OF 14

`14-together`

Current code-drawn version — reference only

The app screen it sits beside

NARRATION FOR THIS STEP

> *“Pacsana gives peace of mind, acting as their eyes and ears when family or carers cannot be there.”*

WHAT THE PICTURE MUST CARRY

The close: independence kept, and nobody left guessing.

COMPOSITION

Peg and Mary together at home, relaxed, turned towards each other. Warm light.

NOTES

The last image of the tour and the one that carries the product promise. Warmth without sentimentality — no hugging-on-a-doorstep stock-photo staging.

ALT TEXT TO MATCH

The woman and her daughter together at home
